## ELECTRICAL CONTRACTOR

**M&M Electrical LTD**

Prudential were re-occupying this floor in Holborn Bars/Waterhouse square.

A 500x500mm ceiling system (Alugrid 15/16) was to be used, however due to a shallow void all luminaires were to be installed in their own depth.

After our initial discussion we modelled a non-standard fitting and as the images show other than some minor client changes, the fitting installed was essentially the same as the visualisation, except with MPK sides.

At the clients request all fittings were installed with Col865 daylight lamps.
