Archer Contracts

South Street, in the heart of Mayfair is one of London's most prestigious addresses. The client via their agents; Archer Contracts had a clear idea about their building particularly lighting. We offered our patented RET Adjust which assists with LG7 compliance and in its recessed form means clean ceiling lines. A 500x500mm ceiling was chosen and prior to manufacture we made visualisations to ensure the client was happy with the concept.

- All fittings were made to 'lift and tilt' into an Alugrid 15/16 ceiling.
- 450 fittings were installed.
