

## CLIENT

Foreign and Colonial/RBS

## PRODUCT

RET Adjust Range

## CONSULTANT

RHB Partnership

## CONTRACTOR

Trilectric Ltd

Some floors of this building were to be occupied by a known tenant yet others were fitted out to be let. In the absence of being able to discuss specific requirements the client realised the benefit of using our patented RET Adjust - Whilst marketing the floors all fittings were installed with the gondola recessed yet if required could be easily dropped to meet LG7, thus helping with marketability and compliance.

- Designed to be fitted into an **SAS 130** ceiling but with a non-standard **RAL** colour.
- 700 fittings installed.
