PRODUCT

RET8300 Range

ELECTRICAL CONTRACTOR

Mala Electrical Ltd

St Brides House is in the Fleet Street conservation area, approximately 48,500 square feet over 7 floors.

Due to building constraints the tile size was not a standard and therefore a 4 foot lamp option was too long.

The ceiling tile being under 1200mm we created a bezel end on high output 39W lamp to fit the ceiling and dimming gear was used to ensure energy efficiency. 1000 fittings were installed.
