ELECTRICAL CONTRACTOR

Mace

The iconic Shard. Lumitron were selected to supply all linear fitting on the office floors.

The professional team chose our patented RET adjust as it offered the unique and patented ability to have clean ceiling lines when recessed and was likely to meet LG7 when the gondola was dropped.

In addition at mock-up stage we responded quickly and pro-actively to client changes and realised that a building such as 'The Shard' would need minor adaptations to a product, these were made without fuss and at short notice.
